

**General**

**The Standard Valve Set** is an inexpensive option and includes one (1) adjustable and one (1) non-adjustable ½" angle valve. (1 – FF16WAC / 1 – FF16LAC) They are chrome body valves with white handles and are available in angle pattern only. Most commonly used with the INT and the COS models but work on all of our Towel Warmers.

**The Modern Valve Set** is available in angle and straight pattern. Straight valves are normally used when the pipes come from the floor instead of the wall- V16S "Straight" or V16A "Angle". These valves are available in finishes to match your towel warmer.

**The Cross Handle Decorative Valve Set** is a great match for our European Tradition Collection. The set includes two (2) Cross Handle valves CHV16. The Cross Handle valves are only available in an angle pattern and may be matched with your Towel Warmer finish.

**The Sleeve Kit** will usually be in a matching finish - SK16 (CH,NI,RB,SN,ORB or WH) The set includes two (2) .656" I.D. x 3" brass sleeves and two (2) 2" diameter brass escutcheons.
